The Contractor understands and recognizes that all Kiowa Tribe buildings, whether leased or owned, and the grounds surrounding those facilities are considered by the Kiowa Tribe to be tobacco free workplace. The Contractor will ensure all employees, subcontractors, and other workers will abide by this policy.

Scope of Work:

The Director of the Kiowa Child Care Program is requesting one (1) storm shelter be completed at 1602 Independence Street, Anadarko OK, 73005 and two (2) at 502 S. Country Club Road, Anadarko, OK 73005. The proposed storm shelters will serve the facility in the capacity of a safe place to shelter if weather mandates that response. The shelter requirements and scope are listed below:

Design Criteria	Must meet ICC-500-14 and other relevant building codes, ensuring they can withstand extreme winds and debris Code section references: 320.1, 320.2, 320.3. Must meet FEMA P-361 and ICC 500 standard which outlines the design and construction of safe rooms for tornadoes and hurricanes.
Structural Safety	Shelters should be constructed with strong, reinforced materials such as steel or concrete.
Building Codes	Installation will be required to be inspected by local and state zoning, licensing and must meet safety standards.
Construction Standards One (1) storm shelter at 1602 Independence Street – Anadarko, OK	Shelter should include ventilation systems and accessibility features to accommodate all users, including two (2) emergency baby cribs, and for those with disabilities, first aid and emergency kits. Shelter shall be 8’ x 20’ in size (photos attached)
Construction Standards Two (2) storm shelters at 502 S. Country Club Road, Anadarko, OK	Shelter should include ventilation systems and accessibility features to accommodate all users including those with disabilities, first aid and emergency kits. Each shelter shall be 8’ x 12’, one (1) located on north side and one (1) located on south side of building.

To build an above-ground concrete storm shelter for a childcare center in Oklahoma, the following requirements must be met:

- Building Permit: A building permit is required for any storm shelter installation. This ensures that the shelter is installed correctly and meets safety standards.
- Documentation: Gather necessary documentation, including a completed building permit application, site plan, and manufacturer's specifications.
- Engineer's Certification: Obtain an engineer's seal or certification that the shelter meets FEMA standards for wind resistance and structural load.
- Compliance with Codes: Ensure compliance with the International Residential Code? (IRC?) and other relevant state and federal building codes.
- Installation: The shelter must be installed by professional service.
- It is crucial to follow these requirements to ensure the safety and legal compliance of the storm shelter for the childcare center.

To meet licensing requirements for building a concrete storm shelter used by a childcare center in Oklahoma, consider the following:

- Foundation and Anchoring: Ensure the foundation can resist uplift, overturning, and sliding forces during extreme wind events. This is crucial for safety during tornadoes.
- Design Standards: Follow the ICC 500 standard, which provides minimum requirements for the design and construction of storm shelters. This includes structural design criteria and sitting requirements.
- FEMA Guidelines: If using federal grant funds, adhere to FEMA P-361, which outlines the design and construction of safe rooms for tornadoes and hurricanes.
- Inspections: Ensure that the shelter is built according to approved plans and undergoes necessary inspections to verify compliance with safety codes.
- For detailed requirements, refer to the FEMA P-361 document and the ICC 500 standard.
